## C. Abrupt Tonic 4

- 1. Information
  - a. Goes directly to the tonic chord of the new key in second inversion
  - b. Top voice best approached by step-wise motion
  - c, Possibilities
    I4 / I4 V7 / I4 ii7 V7 / I4 vi ii7 V7

## 2. Example:

## D. Interlude Modulations

- 1. Information
  - a. Usually two or four measures
  - b. Involves two to four chords, the last two being ii7 and V7 in the new key [See Modulation Chord Chart for chord possibilities]
  - c. Each chord gets two or four beats

## Modulation Chord Progression Chart

İ	Up a minor second	OLD KEY I	NEW KEY   iii ii7 V7	
2	Up a major second	(I vi)	ii7 V7	:
3	Up a minor third		ii7 V7	
4	Up a major third	-	I4 (vi7 ii7) V7	
<b>5</b> .	Up a perfect fourth		ii7 V7	
6	Up a tritone	(iv)	iii ii7 V7	
7	Up a perfect fifth	(I V <sup>6</sup> )	ii7 V7	
8	Up a minor sixth	(I	vi) ii7 V7	
9	Up a major sixth	$(I \underline{II}_a^4)$	ii7 V7	
10	Up a minor seventh		ii7 V7	
//	Up a major seventh	(I)	iv ii 7 V7	

2. Example of the procedure for writing interlude modulations:

- E. Some Other Interesting Types of Modulation
  - 1. Sequential (Repetition of a melodic/rhythmic motive in a different key)

2. Progressive Sequential (Generally several Abrupt Tonic 4's, each a third higher)

3. Omnibus (Chord progression dependent on contrary motion scale lines)
